Math Game: Jumping Aliens Algebra

✓ What I Practiced

What helped your alien leap across the platforms?

- ☐ Variables with the same base ☐ Other:
- ☐ Combining like terms
- ☐ Multiplying integers

⚙️ How I Solved It

Simplify the expression. Show your thinking.

$$(-3b)(-5b)$$

$$(8y)(-2y)$$

📌 Next Steps

What made your alien miss a jump?

What will help you do better next time?

- ☐ Learn exponent rules ☐ Other:
- ☐ Practice multiplying integers
