Math Game: Triplets

### ✔ What I Practiced

How did you make each Triplet team?

☐ Added a model to each target mat   ☐ Other:

☐ Matched fractions to the models

☐ Looked for equivalent fractions

⚙ How I Solved It

Circle 2 fractions that are the same as the model.

$\frac{2}{6}$ $\frac{6}{9}$ [model: 1 of 3 shaded] $\frac{1}{3}$ $\frac{3}{6}$

Circle 2 fractions that are the same as the model.

$\frac{4}{12}$ $\frac{3}{4}$ [model: 3 of 4 shaded] $\frac{4}{8}$ $\frac{9}{12}$

▟ Next Steps

What was tricky about making fraction teams?

What will help you next time?

☐ Look for familiar fractions first   ☐ Other:

☐ Practice with a number line
